

Big Plans for Small WinChip 1
 Future WinChip processors will include 3DNow extensions, an integrated north bridge, and a 600-MHz superpipelined design.

Editorial: Can Palm Pilot Overcome Its Success? 3
 As the PDA market heats up, will WinCE-based designs do to Palm Pilot what Windows did to Macintosh?

Most Significant Bits 4
 Intel pushes Covington to 300 MHz; IBM rolls out 6x86MX at PR333; Cyrix breaks into Packard Bell stronghold; Savage3D to salvage S3; S3 sues Nvidia over Cirrus, Pixel patents; Micron defines mysterious "Socket X."

Embedded News 8
 Sega announces Katana as Dreamcast; Coldfire 5206e increases speed, cache; HP's embedded Java rides on four RTOSs; Matsushita licenses ARM7TDMI; Mobile Pentium II module goes embedded.

PLX Drives I₂O With PowerPC 9
 Based on IBM's PowerPC 401 core, the IOP 480 is less expensive than the i960Rx competition from Intel.

Mario Makes Millions for MIPS 10
 MIPS revenues depend heavily on the Nintendo 64.

IDT RC32364 Tops in Price/Performance 12
 The first 32-bit microprocessor to break the 10-MIPS/dollar barrier.

AMD Uses 80186 for Network Control 14
 AMD's 186CC combines an 80186 core with HDLC channels, sync and async serial channels, USB, timers, and memory controller.

AMD Deploys K6-2 With 3DNow 16
 AMD announced its new 0.25-micron K6-2 with improved MMX performance, 3DNow, a 100-MHz bus, and core speed of 333 MHz.

3DNow Boosts Non-Intel 3D Performance 18
 The new 3DNow extensions that AMD, IDT, and Cyrix will use to beat Intel to the punch on parallel floating-point capability for 3D.

Bluetooth Creates Personal Wireless Network 22
 Industry giants Ericsson, IBM, Intel, Nokia, and Toshiba collaborate on a new wireless link that could revolutionize the way we connect computers and personal electronic devices.

Alternative Slot 1 Chip Sets Emerge 26
 VIA and SiS challenge Intel in the battle for Slot 1 chip sets.

The Slater Perspective: Computing for the Other Half 28
 More than evolutionary changes are needed to make computing ubiquitous.
