

Manual Update Sheet

DATE: January 1, 1997

Document Being Updated: *TMS320C2x User's Guide*

Literature Number Being Updated: SPRU014C

Part Number Being Updated: 1604907–9761 revision C

This Manual Update Sheet appends TMS320C25FNA specifications to the TMS320C25/TMS320E25 Digital Signal Processors Data Sheet (Appendix A) in the *TMS320C2x User's Guide*.

Page: **Change or Add:**

A–19 In Appendix A, under electrical characteristics over specified free air temperature range, the TMS320C25GBA and the TMS320C25FNA specs are included in the following table for the input current on the X2/CLKIN pin.

PARAMETER		TEST CONDITIONS	MIN	MAX	UNIT
I _I	All inputs except X2/CLKIN	V _I = V _{SS} to V _{CC}	– 10	10	μA
	X2/CLKIN	V _I = V _{SS} to V _{CC}	– 20	20	μA

IMPORTANT NOTICE

Texas Instruments (TI) reserves the right to make changes to its products or to discontinue any semiconductor product or service without notice, and advises its customers to obtain the latest version of relevant information to verify, before placing orders, that the information being relied on is current.

TI warrants performance of its semiconductor products and related software to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are utilized to the extent TI deems necessary to support this warranty. Specific testing of all parameters of each device is not necessarily performed, except those mandated by government requirements.

Certain applications using semiconductor products may involve potential risks of death, personal injury, or severe property or environmental damage ("Critical Applications").

TI SEMICONDUCTOR PRODUCTS ARE NOT DESIGNED, INTENDED, AUTHORIZED, OR WARRANTED TO BE SUITABLE FOR USE IN LIFE-SUPPORT APPLICATIONS, DEVICES OR SYSTEMS OR OTHER CRITICAL APPLICATIONS.

Inclusion of TI products in such applications is understood to be fully at the risk of the customer. Use of TI products in such applications requires the written approval of an appropriate TI officer. Questions concerning potential risk applications should be directed to TI through a local SC sales office.

In order to minimize risks associated with the customer's applications, adequate design and operating safeguards should be provided by the customer to minimize inherent or procedural hazards.

TI assumes no liability for applications assistance, customer product design, software performance, or infringement of patents or services described herein. Nor does TI warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right of TI covering or relating to any combination, machine, or process in which such semiconductor products or services might be or are used.
