

IBM 8228 Multistation Access Unit

Highlights

- Supports STP and UTP cabling
- Offers connections for up to eight devices
- Supports interconnection with other hubs
- Offers flexible mounting options
- Provides eight token-ring ports
- Offers RI/RO ports

Features and Benefits

Growth options

- Up to thirty-two 8228s can be joined together using the RI/RO ports.

Ease of use

- Devices are simply plugged in to form a network. The 8228 will detect the presence of a signal for each of the eight connections and will configure the ring.

Space-saving

- Fits in a 19-inch rack or on a shelf, or is wall-mountable

Key Selling Points

- Ease of use
- Flexible mounting options
- Fits in a standard wiring closet
