This edition of Chart Watch covers x86 and PowerPC processors for PC and Apple Macintosh systems. The first table shows the latest pricing for Intel processors. The second table provides comparable pricing from other x86 vendors.

The figure at right shows historical Intel list pricing back to 1Q98 and MDR's projected Intel pricing through 4Q99. The figure below graphs the manufacturing costs of these chips as estimated by the MDR Cost Model.

Estimated Manufacturing Cost (Source: MDR Cost Model)

The table below compares Motorola's current prices for PowerPC chips with those for comparable Intel parts; IBM also sells PowerPC processors, but its prices tend to be slightly higher than Motorola's. The table matches processors with comparable integer performance, based on SPECint95 (base), but does not include floating point.
