

## RESOURCES

{2/28/00-res}

### ◆ OPEN YOUR EYES TO ENTERPRISE JAVA

O'Reilly & Associates, well known for its computer-programming books with woodcut cover illustrations of exotic animals, is sponsoring the O'Reilly Conference on Java in Santa Clara, Calif., from March 27 to 30. The conference focuses specifically on Enterprise Java, the use of Java in large client/server environments, but topics such as Java 3D programming are also included among the many tutorials and conference sessions.

Registration fees range from \$395 to \$2,190. For more information, see [conferences.oreilly.com](http://conferences.oreilly.com).

### ◆ NETWORKING IN NEVADA

For the latest networking news, join 60,000 network-technology experts (and Bill Gates) for NetWorld+Interop in Las Vegas, May 7–12. Tutorials, workshops, conferences, exhibits, and keynotes (including Gates's) should keep you occupied for the full six days—and if not, there's always Star Trek: The Experience at the Las Vegas Hilton.

Early conference registration costs \$595 to \$2,595 (by May 2). Admission to the exhibition is free when registering online through the show's Web site at [www.interop.com](http://www.interop.com).

### ◆ COMM TO ATLANTA IN JUNE

The communications industry will converge on Atlanta June 4–8 for **SuperComm 2000**, a conference that covers the convergence of cable TV, telephone, and Internet services. About 50,000 people are expected to attend more than 240 education sessions and visit almost 800 exhibitors at the Georgia World Congress Center.

SuperComm registration is just \$100. Four related conferences are to be held in conjunction with SuperComm, each with separate registration. For more information, visit [www.supercomm2000.com](http://www.supercomm2000.com) or call 301.694.5243.

### ◆ WINHEC'S NOT ALL THAT'S HOT IN N'AWLINS

Don't let the delicious gumbo, étouffée, and jambalaya in the nearby French Quarter distract you from the spicy technology being served up at WinHEC 2000 in New Orleans, April 25–27. WinHEC 2000 will have twice the technical tracks of last year's show, punctuated by keynotes from the ubiquitous Bill Gates, Intel VP Pat Gelsinger, and MDR's own Michael Slater.

For more information, visit the WinHEC Web site at [www.microsoft.com/winhec](http://www.microsoft.com/winhec).
