MORE POWERFUL SOLUTIONS IN SMALLER PACKAGES: The compact and powerful IBM Personal System/2 (TM) Model 50 can process information up to twice as fast as the IBM Personal Computer AT (R). Above, employees of a land development firm use the high-performance, 80286-based desktop Model 50 and the new IBM Personal System/2 Monochrome Display Model 8503 to plot a subdivision. In the background, an IBM Quietwriter (R) III Printer, which is even quieter and twice as fast as the previous model, is ready to produce high-quality graphics.
